Installing Digitizer Driver

Installation of a new digitizer driver requires you to:

- 1. Uninstall an older version
- 2. Install the new driver

To uninstall an older digitizer driver:

- 1. Click Start, then click SP Device > Uninstall to uninstall the older driver. This activates the ADQ Software Uninstall wizard.
- 2. Click Next.
- 3. Click Uninstall. This removes the ADQ Software from the folder location depicted in the wizard.
- 4. Click Finish to complete the ADQ Software uninstall.
- 5. Restart your computer to complete the uninstall.

To install the new digitizer driver:

- 1. Navigate to C: \Keysight\WAFERPROXP_2016_04_HF2\alfna\drivers folder.
- 2. Run the installation file, ADQ-setup_r27295.exe, to start the installation process. This invokes the ADQ Software Setup dialog box, which extracts the components and guides you through the installation.
- 3. Click Next.
- 4. Click I Agree, to accept the license terms and continue.
- 5. From the Choose Components screen, check/uncheck the required components, then click Next >.
- From Choose Install Location screen, click Browse... to specify the location to install the ADQ Software other than the default path, c:\Program Files\SP Devices.
- 7. Click Install, to start the installation process.
- 8. Click Finish, to close the installation wizard.

```
NOTE Check the Open ADQ Quick Overview in Web Browser check box (if required).
```

- 9. Restart your computer to complete the installation.
- 10. Click Start > Control Panel > Device Manager.

11. Locate Other devices and right-click on PCI Data Acquisition and Signal Processing Controller, then click Update Driver Software...

This launches the Update Driver Software Wizard for the selected device.

- **12.** From the Update Driver Software screen, select Browse my computer for driver software.
- 13. Click Browse... and specify C:\Program Files\SP Devices\Drivers\PCIe\adq_pcie_x64 location.

14. Click Next, to start installing the driver software. When the driver is successfully installed, the driver name appears on the screen (depicted below).

- **15.** Click <u>Close</u>, to close the Update Driver Software wizard.
- **16.** Restart your computer to complete the driver software update.
